DETAILED ACTION

This communication is in response to amendment received on 01/10/07.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 16 – 29 and 31 - 32 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a judicial exception; as such, pursuant to the Interim Guidelines on Patent Eligible Subject Matter (MPEP 2106)), the claims must have either physical transformation and/or a useful, concrete and tangible result. Although, the claims appear useful and concrete, there does not appear to be a tangible result claimed. Merely determining a property of the degraded region responsive to the second signal would not appear to be sufficient to constitute a tangible result, since the outcome of the determining step which has not been used in a disclosed practical application nor made available in such a manner that its usefulness in a disclosed practical application can be realized. As such, the subject matter of the claims is not patent eligible. Since the focus is on the result, the outcome of the determining step, which is the last step and therefore the final result achieved by the claimed invention

Art Unit: 2862

does not appear to provide a useful, tangible and concrete result (Note MPEP 2106, Section IV).

Applicant's arguments with respect to claims 16 – 29 and 31 - 32 have been considered but are moot in view of the new ground(s) of rejection.
